Для правильного создания PDF необходимо разместить макет в файле на одной или нескольких страницах. В файлах готовых для вывода фотоформ или пластин размер страницы должен быть больше размера объектов. Если подготавливается файл для дальнейшего монтажа на печатный лист, то размер страницы в файле должен равняться обрезному размеру изделия (этикетка, коробка, визитка и др.), а за пределы страницы должны выходить поля для обреза 2-5 мм.

## Создание PDF в CorelDraw

В меню File выбираем Publish to PDF.
